

# lotTracker

LotTracker traces Lot Quantities by location from receipt to sale. Conveniently retrieve the Sales order from Order Entry or Adagio Invoices and select the Lot and Quantity for Lotted Items from those available for sale. In CounterSales or JobTracker, select the Lot and Quantity directly from the sales or job parts screen while adding items to the sales invoice or the job. When sold, Lotted items are recorded in the Lot History file with customer, vendor, sales details, and expiry information included for reporting or display. Transactions can also be recorded or edited directly; if a sales module is not available; or changes are required after the sale is processed.

## Features and Benefits

- Easily record Lot numbers with quantities of items in stock, by location.
- Scan Lots or select them from the available list to assign them to Order Entry or Adagio Invoice item lines.
- Select Lots directly from the CounterSales Sales screen, JobTracker Parts screen or POTracker Receipt screen..
- Track expiry date quantity remaining and vendor information on all Lotted items.
- Transfer lots and quantities from one location to another
- Inquire on the Status of all lots for an item.
- Print Lotted transactions and item reports.
- Scan lot numbers during invoice processing.
- View and print lot history by item, location, lot number or customer.
