

ReportGen

ReportGen gives business users the ability to create reports for Adagio and or IMS application data when they are needed. The reports can be saved and reused as required.

Implementation

- Name your report.
- Open it.
- Add a dialog page.
- Select the data for the report.
- Design the report layout.
- Print the report.

Operation

- Print the report.
- Design the report.

Print your reports with the format and data that you want, when you want.
